Glasgow 13th April 1850

Boston Dear Sir

I beg to introduce to you my friend Mr Springton Brown, whom I dare say you will remember meeting when you were in Glasgow.

Mr Brown goes with his wife & family to America intending to settle in the New England States; he is of your own profession, a Printer, that has been in business on his own account in Glasgow for several years; he is also a very excellent Lecturer on Anatomy & Chemistry, & which in connection with farming he intends prosecuting.

Mr B. has long been an ardent & valiant worker here in moral reform movements; friends in Glasgow who know his sterling worth & ability regret his departure very much.

I will feel personally obliged by any attention or information you may be able to give to
